## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3738

The Applicant has failed to specifically point out the support in the original disclosure for each of the newly presented claim limitations (M.P.E.P. 714.02) and must do so in response to the present Office action.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Hanna, US 2002/0138140 A1, which discloses an anterior portion (Figures 4 and 5) in combination with a posterior portion **120** (paragraph **0056**). The anterior portion includes anterior translation members **13** and **14** and spaced attachment areas **13a**, **13b**, **14a**, and **14b**, which inherently have a width to thickness ratio greater than or equal to 3 (Figures 4 and 5; paragraph **0054**). The posterior portion comprises a posterior viewing element **125** and a posterior translation member **121**. Each anterior translation member, which encompasses a shoe **6** or **7**, meets the posterior translation member **121** at an apex of the IOL (Figures 15-20). Regarding claim 2: paragraphs **0066** and **0067**. Regarding claim 3, the posterior biasing element is attached to spaced attachment areas at the periphery of the posterior viewing element **125** by virtue of the slots **126**.

Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Woods, US 6,299,641 B1. In the embodiment of Figures 10 and 11, first and second attachment areas are spaced apart by the openings **90a** and **90b**. Regarding claim 2: column 4, lines 43-46; column 5, lines 1-30.

Art Unit: 3738

Claims 4-6 are allowed.

The Applicant's remarks have been considered but are deemed to be moot in view of the new grounds of rejection presented above.
